VALID AND LIMITED SPECIES POINTS CALCULATION

It will be considered valid catches those captured alive and free in their natural environment.

Points Calculations

First phase: Traditional punctuation

Group I:
Moray eel are limited, only 5 units per day, 4,000 grams minimum weight with a fixed punctuation of 2,000 point plus the valid capture additional bonus.

Group II:
The established minimum weight for valid captures in this Group II is 1,000 grams, with the exception of:

- The established minimum weight for wrasse is 1,350 grams.
- The established minimum weight for grouper is 3,000 grams.

All species in Group II are limited to a maximum of 10 catches.

Valid captures will count 1 point per gram plus the valid captures additional bonus (the same as the established minimum weight that is 1,000 points).
If the number of captures exceeds the authorized species units, the bigger ones and their additional bonus will not count.

The maximum weight per capture is 12,500 grams plus the valid capture additional bonus.

Each capture that do not reach the 2/3 or 67% of the minimum weight will be penalized with the same points as the minimum weight required for that specie.

Bonus per specie: bonus equal to general minimum weight (1000 points), for every different specie caught in the day of competition.
**Bonus for completing quota of specie:** bonus equal to 2 X general minimum weight (2000 points), for every completed quota of specie (máximo number of valid catches completed for the specie).

La puntuación individual tradicional, será igual a la suma del peso de las especies válidas más los bonus por capturas, especies y cupos completos, menos las penalizaciones.

**Individual punctuation will be equal to the valid captures total weight, plus captures total additional bonus, plus bonus per species, plus bonus for completed quotas, minus total penalizations.**

**Phase 2: Punctuation in percentage points.**

According to regulations the day classification will have been previously calculated in points in Phase 1. Competitor punctuations will be turn into percentage taking as reference the best-classified competitor from each session. The competitor that obtains the higher punctuation gets the 100% and the subsequent competitors punctuation will be calculated as a percentage over the first classified 100%.

**THE CALCULATION FORMULA**

\[
\frac{\text{Competitor's day punctuation}}{\text{Best-classified competitor day punctuation}} \times 100
\]

**FINAL CLASSIFICATION**

**Individual classification:** It will be determined by the sum of the two days punctuation and it will be expressed on percentage. In case of punctuation draw it will count the higher number of valid captures, if equality is maintained it will count the major capture. (Morain excluded)

**National Teams classification:** It will be determined by the sum of the two days punctuations of every nation competitor and it will be determined on percentage.
