CMAS FOUR STAR DIVER

(VERSION 2002/00)

CMAS FOUR STAR DIVER

1 Definition

A three star diver who has attained a higher than average level of knowledge and ability supported by broad experience. He will be competent to use divers and diving to achieve major tasks or project objectives.

2 Entry requirements

- 2.1 Must have held a 3 Star Diver Certificate for at least 2 years.
- 2.2 Must have been a member of his Federation for at least 5 years.
- 2.3 Must have carried out at least 100 dives, under varying conditions, since obtaining 3 Star Diver Certificates.

3 Course content

It is not considered that this level will be reached following a course of fixed content, but rather as the result of experience acquired over an extended period and incorporating a broad range of conditions and requirements.

4 Assessment

The diver must be able to prove his capabilities in organising diving expeditions and other diving activities with a particular stress on safety and emergency procedures, and by proving his competence in a given specialised area or in a scientific discipline.

The assessment will be made at a national level by a panel composed of 3 Star Instructors and confirmed by the responsible National Technical Committee.
