Croatian Championship:

- Medals shall be awarded for 1st, 2nd, and 3rd place in the individual men's and women's categories, separately for each discipline.
- The overall best male and female competitors shall also be ranked. The overall winner is determined by summing all points achieved across the individual disciplines.
- In the club ranking category, the following are evaluated separately: best women's team, best men's team, and best mixed (men–women) team.
The best mixed team is determined by summing the total results of the two best male competitors and the two best female competitors. If a club does not have two female competitors, it shall still be included in the ranking, but with a proportionally reduced number of points.

Open Championship:

- Medals shall be awarded for 1st, 2nd, and 3rd place in the individual men's and women's categories, separately for each discipline.
- The overall club ranking shall be evaluated for the mixed (men–women) team, determined by summing the total results of the two best male competitors and the two best female competitors.

Scoring:

Scoring is determined in relation to the current world record in each discipline, according to the following formula:

$$(\text{achieved result} / \text{world record}) \times 100 = \text{percentage score relative to the world record}$$

Examples:

- Men's DYN discipline: $(275 / 326.5) \times 100 = 84.23$ points
- Men's STA discipline: $(9:13 = 553 / 10:45 = 645) \times 100 = 85.74$ points
